									default. Release Later will s the Rebate Request until the "Bank" Qty is greater than 0

The Fulfillment screen shows a "0" for a catalog number. User should not submit. Release later will capture the Rebate Request. Click on Apply. User orders the missing catalog number into stock. The "Bank" updates the purchase. User can not process the Release later request.

Note the order is processing and then provides an order number.

POD-Channel Partner Stock – Release Later

In the last video we talked about Export. Export provides detailed line-item pricing information. Because we selected Release Later, we now need to Reapply Fulfillment to process the Rebate Credit. Release Later is selected for different reasons. One of the reasons can be to replenish a out of stock item. If so, make sure the item was shipped and invoiced before Reapplying Fulfillment.
